## DETAILED ACTION

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Armstrong in view of Bart et al. The Armstrong patent discloses a system for delivering emergency medical information comprising bracelet 28 containing chip 1 with medical information stored therein for retrieval. The system further includes computer 12 for interfacing with chip 21 for providing data for storage therein. The reference does not provide a speaker for outputting the contents of the chip in audio form. Bart et al, however, teach the storage and retrieval of audio information stored on a voice chip 19 and incorporated in a bracelet 12 for playback through speaker 20. One skilled in the art having both references would thus have a suggestion that the data stored in chip 1 of Armstrong may be audibly reproduced by providing voice circuitry with a speaker, as shown in Bart et al.
